Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 – 10, drawn to methods of prevention of neuronal death by administration of anti-oxidants.

Group II, claim(s) 11 – 13, drawn to inhibitors for neurotrophin-induced cell death.

2. The inventions listed as Groups I – II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the first claimed technical feature, administration of anti-oxidants, does not define a contribution over the prior art and therefore is not a special technical feature as defined by PCT Rule 13. Iacovitti (1999. Brain Research 816:276-285) teaches that administration of the antioxidants Trolox and melatonin prevent death of striatal neurons (see p. 282 section 3.7). As the prior art reference anticipates claim 1, the first technical feature is not a special technical feature. Additionally, the technical feature of Group I is not the same as the technical feature of Group II. The technical feature of Group I is administration of anti-oxidants, whereas the technical feature of Group II is an inhibitor product. As the first claimed technical feature is not a contribution over the prior art, and the two groups do not share the same or a corresponding technical feature, unity of invention is lacking. Note that PCT Rule 13 does not allow for multiple products or methods within a single application.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
